| Kafka |

| Docker & Docker Compose |

About me

I define myself as a passionate and organized person. I am rigorous, efficient and I appreciate quality work.

I am constantly learning about new technologies, and I undertake new personal projects in order to deepen my knowledge as well as to be able to propose solutions adapted to the work.

I particularly like working in a team but I also know how to be independent when necessary.

I thrive not only by working, but also by bringing value to the company, in which the ability to face challenges, recognize and rectify mistakes and be tenacious is essential.

Language

French - English - Chinese
